You have a wealth of business data in your ERP system. What do you do when you want to use it?

Are you able to able to intuitively access data in your CloudSuite Distribution in a form that you can use for smart decision-making? Business improvement applications could give you the insight needed to future-proof your business and outperform your competitors. **If only you had access to the gold mine of business data in your ERP system.**

→ **Access to Business Data: That's Why We Built ProData.**

ProData communicates with the Infor Data Fabric and replicates the data in an accessible data warehouse *in near real time.* The SQL database it creates to store your data can be accessed by virtually any tool.

Our team can host the data warehouse on an Azure server, or we can replicate the data to your own servers that are running SQL. You'll have secure access to the data in either situation.

ProData empowers your IT team to use tools they're already familiar with to create sophisticated reporting geared towards decision-making that gets at the heart of company growth and performance. Adding our **CloudDecisions** product provides prebuilt Business Analytics on top of **ProData**. Additionally, business improvement applications like our **ProSales** and **ProAdvisor** can pull information from the **ProData** database and give you a whole new way to manage your business using the latest data available.

WHY CHOOSE PRODATA?

ProData is the most efficient and effective way to establish easy access to your data, while at the same time ensuring that you maintain control over sensitive information. These are just some of the benefits of using **ProData**:

- Data is stored in an SQL database, where virtually any reporting tool can access it.

- Data resides on Azure or a customer's on-premise system, not a third party vendor's servers, which leaves the customer in control of their data.

- The available data is near real time. No batch updates are used that require extensive time, effort, and system resources to fix issues as they arise.

- The data coming from the ERP data lake is cleaned as it is replicated.

- **ProData** is Microsoft-centric. Customers who already use Microsoft products such as Excel can easily pull data into an Excel spreadsheet from the Azure installation.

- **ProData** constantly monitors its operation to identify issues before they become emergencies.

- Earnest & Associates provides training and support to make access to your ERP data a seamless process.

TAKE THE NEXT STEP

If you're tired of the time and effort you've expended to get at your data, or tired just thinking about what you'd need to do to get at that data, **ProData** is your answer. Start your journey to easy, intuitive ERP data access today.

And, if your aim is to achieve genuine operational excellence, consider **ProAdvisor** and **ProSales**. These applications turn your ERP data into supercharged information for your decision makers. They'll see previously undiscovered opportunities that drive productivity and profitability.
